

The screenshot displays the Visual Studio Code interface. The Explorer sidebar on the left shows a project named 'AI ALB PROGRAMS' with files: '.dist', '.gitattributes', 'best_first_search.py', 'bfsanddfs.py', and 'README.md'. The main editor window shows the 'best_first_search.py' file with the following code:

```
def best_first_search(graph, start, target, heuristics):
    return None, None

# Example usage
if __name__ == "__main__":
    graph = {
        'A': ['B', 'C'],
        'B': ['D', 'E'],
        'C': ['F'],
        'D': [], 'E': [], 'F': []
    }

    heuristics = {
        'A': 10, 'B': 8, 'C': 5, 'D': 6, 'E': 4, 'F': 0
    }

    path, cost = best_first_search(graph, 'A', 'F', heuristics)
    print(f"path found by Best-first Search: {path} with Target Heuristic: {cost}")
```

The TERMINAL panel at the bottom shows the command prompt output:

```
PS C:\Users\keziy\OneDrive\Desktop\AI ALB PROGRAMS> python -u "c:\Users\keziy\OneDrive\Desktop\AI ALB PROGRAMS\b
est_first_search.py"
path found by Best-first Search: ['A', 'C', 'F'] with Target Heuristic: 0
PS C:\Users\keziy\OneDrive\Desktop\AI ALB PROGRAMS>
```

On the right side, the CHAT panel is visible with a tip: "Try the Plan agent to research and plan before implementing changes." Below the tip, there is a search bar containing 'best_first_search.py' and a description prompt: "Describe what to build".
